Projects

Tales of Combat - Game Development

September 2022-Present

- Created a online fighting game, developed with the use of Javascript and HTML, manipulating CSS values to create animations and movement
- Hosted website locally through the use of a Raspberry Pi 4, with online implementation utilizing a firebase database

Message in a Bottle- Discord Application Bot

March 2021

- Developed a Discord bot with three other hackathon attendees utilizing Python and the discord.py library
- that worked with the discord API to be responsive to activities of members within a discord server.

Covid Tracker - Web Development

September 2020 - December 2020

- Built a covid-19 website with two other software engineers, with the use of the React framework
- Accessed a public covid database to display diagrams describing the current covid cases within each capital of the world

Leadership

Theta Tau - Phi Epsilon Chapter

Spring 2018-Spring 2021

- Founded a Co-Ed Professional Engineering Fraternity chapter.
- Organized and developed a fundraising plan to provide funds
- Networked with other organizations and the community to organize and lead volunteering workshops.
- Partook in projects with fellow members of the fraternity.

TuffyHacks - Hackathon Mentor/Workshop Host

March 2021

- Demonstrated technical coding skills to attendees on how to launch and customize your own discord bot by guiding them through sample code and a demo.
- Mentored Hackathon Attendees by demonstrating testing and debugging practices in regards to their project activities.
- Judged participant projects based on presentation, ingenuity, and technical objectives.

Experience

Contractor Journeyman

Summer 2016-Present

- Oversee and assist in the management of the project site and the crew members.
- Performing safe and common practices according to state regulations.
- Preparing for the General Building Contractor's License Exam in order to qualify as California Contractor, and undertake building renovations and construction.
